Profile

I am a passionate beginner in front-end design and development, with a great curiosity and enthusiasm to learn and grow in the fascinating world of web creation. I love combining my creativity with my passion for technology to build captivating and functional digital experiences.

Education

Fourth year, VII cycle of engineering in systems and computer networks

Gerardo Barrios University   2021 - Present

Knowledge

Using PC

Microsoft Office (Word, Excel and PowerPoint)

Basic knowledge of: Visual Studio Code, HTML, CSS, JavaScript, Python, C#, PHP, JAVA, React and SQL

Experience

University student passionate about front-end design and development. With solid knowledge in HTML, CSS, and JavaScript, I look for opportunities to apply my skills in practical and collaborative projects. Determined to learn and grow in this field.

Although I have no previous professional experience, my determination and ability to absorb new concepts make me a promising candidate for roles in front-end design and development.
